WORK EXPERIENCE

Ctrl V

Virtual Reality – Developer

Waterloo, Ontario

September 2018 – April 2019

- Integrated V Card (Gift Card) into the existing POS system that was written in Qt and C++
 - Added support for Gift Card related actions such as inquiring, purchasing, redeeming, and refunding
 - \$100,000 worth of Gift Cards were sold via the POS system in 2 months
- Refactored legacy code to enforce design patterns such as Model-View-Controller model and Resource Acquisition Is Initialization pattern
- Created and updated endpoints for server-side Web API that was written using PostgreSQL, Express, and Node.js
- Created a small React page to dynamically display weekly operating hours of 15 locations across Canada, United States and Costa Rica

Unata

Quality Assurance – Automation Developer

Toronto, Ontario

January 2018 – April 2018

- Performed regression & sanity cycles to ensure platform version updates for each client satisfy their respective business requirements and offer a seamless user experience
- Designed, developed, and automated test cases using Robot Framework and Selenium WebDriver, significantly reducing the time to complete test cycles
